

Women's Safety Awareness Website

About the Project

This project is designed to spread awareness about women's safety, providing essential safety tips, emergency contacts, and resources to empower and protect women.

Features

- Emergency Helpline Section – Quick access to essential contacts
 - Expandable Safety Tips – Stay aware and prepared with self-defense and safety advice
 - Semantic HTML Structure – Using <section>, <details>, and <summary> for accessibility
 - CSS Flexbox & Grid – Ensuring a visually balanced and adaptive layout
-

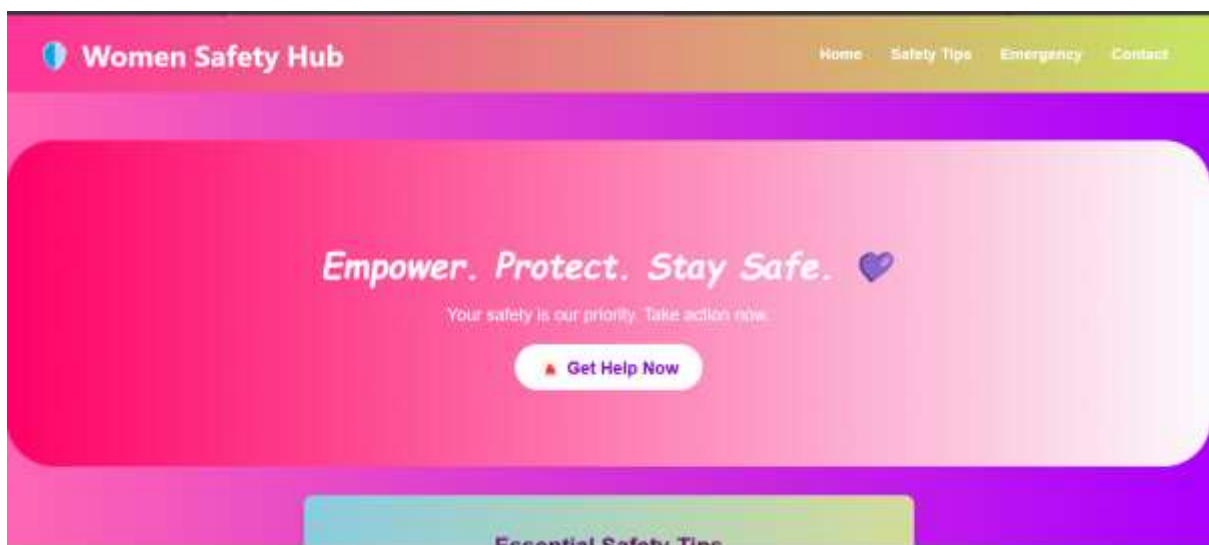

Tech Stack

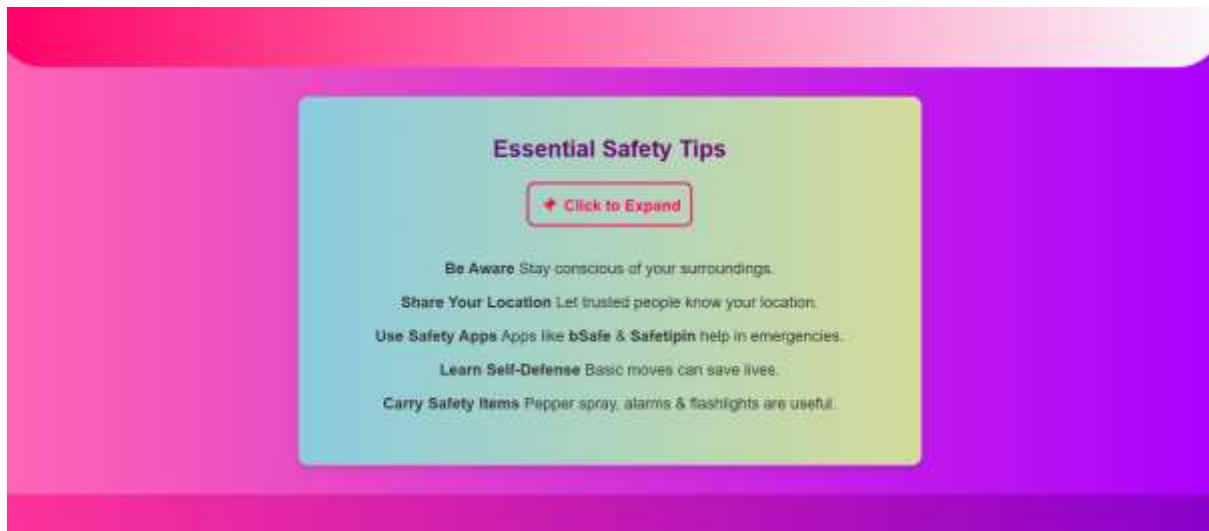

- HTML5 – For a structured and accessible layout
 - CSS3 – For modern styling and responsive design
 - Flexbox & Grid – To create a seamless UI across different screen sizes
-

Skills Learned

- Semantic HTML – Better accessibility and SEO
 - Advanced CSS Styling – Gradients, box shadows, and hover effects
 - Code Optimization – Writing clean, maintainable CSS
-
